| 29/04/2024 | 22:00 | Website Feedback Form  | Odour | Taylor Creek, Tarago    | Approximately 4.5 km West to South West of the site  | Notifier reported an odour described as "Garbage overlaid with a strong chemical smell". The odour was rated as a 6 - Unpleasant to remain in the area   |  | 0.69                 | East North Eastern Wind. Complainant was downwind of the premises.   | 933.691             | 12.25             | Y  | Veolia has engaged The Odour Unit to undertake a gas characterisation assessment to determine the presence of other odour gases. Veolia will continue to implement the recommendations within the 2023 Odour Audit. |            | Date: 26/03/2024<br>ED3N-1: 791.7<br>ED3N-2: 791.65<br>ED3N-3: 791.58<br>ED3N-4: 793.85<br>ED3S-5: 793.28 | Point 9 - 3.2<br>Point 71 - 0<br>Point 72 - 0 | 5:15am - 6:15pm   | Y                                     | An assessment of meteorological data and operational activity has been completed in order to investigate the potential source or cause of odour was undertaken with no significant impacts evident at the time of the complaint. Veolia acknowledges that the premises is potentially the source of the odour detected by the complainant based on the wind direction, and low detection of H2S at the onsite monitoring station. It is noted that the H2S monitors did not detect H2S within Tarago on 29/04/2024. |
| 28/04/2024 | 19:35 | EPA Environmental Line | Odour | Leahys Lane, Tarago     | Approximately 15 km East South East of the site.   | Caller alleging they were impacted by an odour, 'S/6 and rotting garbage, sour milk and dirty nappies', about 7:35pm on 28 April 2024. The resident also stated the weather was a 'still clear evening'. |  | 0.808                | Westerly Wind. Complainant was downwind of the premises.             | 934.143             | 12.46             | Y  | Veolia has engaged The Odour Unit to undertake a gas characterisation assessment to determine the presence of other odour gases. Veolia will continue to implement the recommendations within the 2023 Odour Audit. |            | Date: 26/03/2024<br>ED3N-1: 791.7<br>ED3N-2: 791.65<br>ED3N-3: 791.58<br>ED3N-4: 793.85<br>ED3S-5: 793.28 | Point 9 - 0<br>Point 71 - 0<br>Point 72 - 0   | 5:15am - 6:15pm   | Y                                     | An assessment of meteorological data and operational activity has been completed in order to investigate the potential source or cause of odour was undertaken with no significant impacts evident at the time of the complaint. Veolia acknowledges that the premises is potentially the source of the odour detected by the complainant based on the wind direction, however it is noted that the H2S monitors did not detect H2S at the premises nor within Tarago on 28/04/2024.                                |
| 22/04/2024 | 08:20 | EPA Environmental Line | Odour | Collector Road, Tarago  | Range:<br>* North West max 9 km East from the site.<br>* North 0 km from the site.<br>* East South East 5km max from the site. | Caller alleging they were impacted by an odour described as 'a bad methane odour in the air, no wind and some fog present', about 8:20am on 22 April 2024.   |  | 0.874                | Westerly Wind. Complainant was potentially downwind of the premises. | 938.306             | 7.476             | Y  | Veolia has engaged The Odour Unit to undertake a gas characterisation assessment to determine the presence of other odour gases. Veolia will continue to implement the recommendations within the 2023 Odour Audit. |            | Date: 26/03/2024<br>ED3N-1: 791.7<br>ED3N-2: 791.65<br>ED3N-3: 791.58<br>ED3N-4: 793.85<br>ED3S-5: 793.28 | Point 9 - 0<br>Point 71 - 0<br>Point 72 - 0   | 5:15am - 6:15pm   | Y                                     | An assessment of meteorological data and operational activity has been completed in order to investigate the potential source or cause of odour was undertaken with no significant impacts evident at the time of the complaint.
